

**Ensure access to affordable,
reliable, sustainable
and modern energy for all**

Recognizing the importance of promoting access to clean energy for families in off-grid areas in Colombia, GeoPark developed initiatives to expand networks to facilitate power access for communities that lacked this basic service.

» In Colombia, we equipped

460

homes, three community halls and a school with PV energy systems to provide electricity access for our neighbors in the rural area of Puerto Asis, Putumayo.
